

To whom it may concern,

Discontinuation of the XC638x series' production

Torex Semiconductor Ltd. has considered the product integration and we may be able to steady and timely supply our products suitable for our customers' demand while learning from a present market trend and etc.

A decrease in demand of the XC638x series became remarkable every year because of the series shifting to the alternate and successor products. Therefore, we would discontinue production of the series according to the following schedule.

1. Discontinued products: XC6381, XC6382, XC6383, XC6385 series
2. The last day of receiving orders: December 27 (Wed.), 2006
3. The last shipment from Torex: March, 2007

We would recommend alternative products of XC9110 and XC9111 series for customers.

\* The XC9110 and XC9111 series are successor products, furthermore the series have some advanced specifications comparing to the XC638x series. Please ask for advice to Torex sales person or representatives before using the XC9110 and XC9111 series as the alternatives to the XC638x series.

Last of all, we would appreciate very much for your great understanding for the above-mentioned circumstances and for your patronage to these products for many years.

Best regards,

Koji Shibamiya  
General Director,  
General Sales Headquarters  
Torex Semiconductor Ltd.
